

Brown University Research

Volunteers Needed for an fMRI Experiment on Speech Processing

Participate in a Brown Speech Lab (Sheila Blumstein, P.I.) study investigating the neural basis of speech and language with functional Magnetic Resonance Imaging.

You will be paid \$35 for a one and a half hour session in the MR scanner and a separate 30 minute behavioral test conducted prior to scanning.

You will also receive a CD with *images of your brain* on it!

To participate you must:

- be 18-40 years old
- be right-handed
- be a native speaker of American English
- have no hearing deficit
- have no surgically implanted metallic devices
- have no history of neurological or psychiatric problems
